PROFESSIONAL SUMMARY

Product designer with a bias toward clarity, systems thinking, and work that holds up under scrutiny. Experience across early-stage startups and product teams, leading design for productivity tools, presentation platforms, and digital banking experiences.

Work spans the full product design spectrum — from user research and information architecture through to visual design, prototyping, and design-system architecture. Guided by the conviction that great products are built on clear thinking before polished pixels, and that the best design decisions make complex systems feel inevitable rather than clever.

Background in biochemistry — a discipline that instilled systems thinking, process rigor, and an understanding of the relationship between cause and effect. These principles carry through every design decision, from mapping a user journey to building a design-system component.

EXPERIENCE

Lead Designer / Product Operations Collaborator · **Enviodeck**

Mar 2026 — Present

Start-up environment

Leading design for a presentation platform, building the visual language and component system for a new product entering a competitive market.

- Designed 100+ screens spanning the editor, template library, collaboration features, and export pipeline
- Built a 50+ component design system establishing the product's visual language, component hierarchy, and interaction patterns
- Collaborating on product strategy, user research synthesis, and design operations workflows

Product Designer / Founder-Side Operator · **Candidote**

Aug 2025 — Mar 2026

Fully remote — 3-person team

Joined as the founding designer for a productivity-focused startup, owning the full product design lifecycle from research through implementation.

- Designed 80+ screens across the core product, covering onboarding, dashboard, workspace management, and settings flows
- Built a 40+ component design system from scratch, establishing reusable patterns, variants, and documentation that enabled rapid iteration
- Worked directly alongside the founder as the sole designer — defining product strategy, prioritising roadmap items, and shipping design decisions directly to development

DESIGN-SYSTEMS PRACTICE

Candidote: 40+ components built for a three-person team over eight months. Enviodeck: 50+ components and ongoing work on visual language, variants, and auto-layout systems in Figma.

SKILLS & TOOLS

Product Design

UX research · Information architecture · Interaction design
· Visual design · Prototyping · Design systems

AI Workflows

Prompt engineering · AI-assisted product design · Code
generation workflows · Tool orchestration

Tools

Figma · Framer · Notion · Linear · ClickUp · Miro · Canva · ChatGPT · Claude · Codex · Perplexity · Google Analytics ·
Slack · Airtable

EDUCATION

University of Lagos

Biochemistry — Mar 2023

Google UX Design Certificate

Coursera — Oct 2024
